

HIGHLIGHTS

- Early flowering allows movement north
- Rapid grain set for early geography
- Increased starch quality
- Tolerates cold climate well

AGRONOMY NOTES

E46J77 R combine ultra early flowering with rapid grain set. Plants have exceptional spring vigour. Plants are tall height with moderate ear height. Flowering date is early for maturity. Ears are long and slender with dense grain. Grain sets up quickly for excellent starch quantity in early zones. Plants have average tolerance to Goss's Wilt and NCLB. Position in and north of maturity zone either.
