

## HIGHLIGHTS

- Impressive late season plant health
- Industry leading performance
- Rapid grain drydown
- Strong agronomics
- Moderate response to population
- Excels in variable soils

## AGRONOMY NOTES

E49K32 R combines late season yield potential with early maturity. Plants have moderate plant and ear height. E49K32 R flowers early for its maturity and sets up grain quickly. Ears are large and girthy with 16-18 kernel rows. Husk cover is average and opens well at harvest. Plants have very good tolerance to leaf diseases. Position in and south of maturity zone for optimum performance.
