

## HIGHLIGHTS

- Industry-leading silage performance
- High starch content
- Outstanding agronomics
- Early flowering allows movement north

## AGRONOMY NOTES

E52V92 R combines early maturity with elevated grain quality. Seedlings are dark in colour with upright, narrow leaves. Plants are moderate to tall in height with a low ear height. Plants flower early for maturity. Ears are moderate in size with 14-16 kernel rows. Husks open well in the fall. Grain quality is excellent. Position in and north of zone for optimum yield. Early harvest is recommended south of zone.

## FEATURES

**CHU:** 2300 **RM:** 77  **RIB**

## TRAITS AND TECHNOLOGY

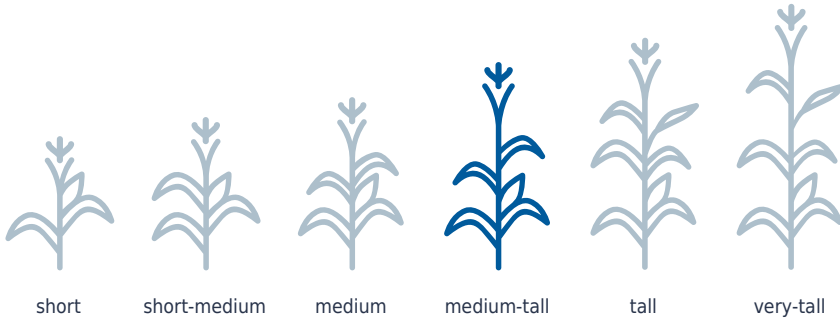

VT Double PRO® RIB Complete® Corn
