

AGRONOMY NOTES

E53G52 R starts with average seedling vigour. Plants are moderate height. Ears are girthy with 16-18 rows of deep kernels. Husks are a bit longer and open well at harvest. Stalks remain strong throughout the fall. Excels under variable soil types but has top end yield for fertile fields. Position at moderate populations (34-36k).

Highlights

- **Top end yield potential**
- **Blocky ears with deep kernels**
- **Open husks allow fast grain drydown**
- **Reliable on variable soils**

CHU: 2550 **RM:** 83
