

HIGHLIGHTS

- Leading yield potential
- Consistent Performance
- Early flowering allows northern adaptation
- Exceptional grain drydown

AGRONOMY NOTES

E65G82 R is know for its solid yield potential and adaptability north of zone. Plants have above average seedling vigour. Leaves are upright and pale in colour. Plants are tall height with moderate ear position. Husk cover is adequate to short and flares open to aid drydown. Grain quality is average. Excellent plant health. Position in and north of zone at moderate populations (32-35k).
