

HIGHLIGHTS

- Large, robust stature for maturity
- Adapted for movement north
- Very good plant health
- Enhanced trait package

AGRONOMY NOTES

LF 9066SMX offers above and below insect protection in Leafy genetics. Plants are pale colour as seedlings. Flowering is later for the maturity when compared to grain corn. Plants have very tall plant height with moderate ear height. Ears are long and slender with short husk cover. Stay green is very good. Leaf disease tolerance is average. Harvest window is extended aiding harvest. Position in zone at moderate to lower populations.

FEATURES

CHU: 2600 **RM:** 87  RIB
