

HIGHLIGHTS

- Floury gene for increased starch availability
- Industry-leading tonnage
- Very good seedling vigour

AGRONOMY NOTES

LFG 8755R has attractive plant appearance, very good seedling vigour and large girthy ears. Grain will have unmatched starch digestibility. Plants are tall in stature with low to medium ear placement. Ears will have 16-18 kernel rows with soft digestible kernels.

Position at moderate populations; north and south of adapted maturity zone.

Management Tip - adjust ration to account for increased starch digestibility.
