

## HIGHLIGHTS

- Increased starch availability
- Aggressive seedling vigour
- Robust plant stature
- White cobs for more palatable silage

## AGRONOMY NOTES

Aggressive seedling vigour allows for rapid emergence and canopy closure. Seedlings develop into large, robust plants with wide leaves. Large ears have kernels with soft texture to increase digestibility. White cobs increase feed palatability. Early flowering allows movement north of zone. Position under moderate populations.

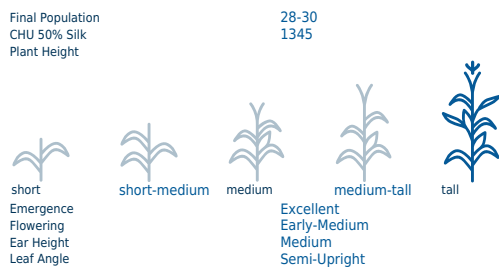

**CHU:** 2200 **RM:** 74

## TRAITS AND TECHNOLOGY

Roundup Ready® Corn 2

## PRODUCT CHARACTERISTICS

**VERY POOR (1)**  
**Early Vigour**

**EXCELLENT (9)**
