

HIGHLIGHTS

- Proven genetics
- Early flowering allows northern movement
- Increased starch availability
- White cobs for more palatable silage

AGRONOMY NOTES

MS 7733DBR combines insect protection with silage specific yield. Plants are tall stature with moderate to high ear placement. Ears are large with 16 kernel rows. Kernels are deep and moderate texture. Cobs are white to increase palatability. Husk cover is adequate to short and ear tips fill well. Plants have very good health and stay green. Position in and north of maturity zone at moderate populations for optimum performance.
