

HIGHLIGHTS

- Industry-leading early-season vigour
- Rapid grain set for early geography
- Large harvest window

AGRONOMY NOTES

MS 8022R has exceptional spring vigour and early season growth – towering over many hybrids. Plants have tall height with moderate to high ear placement. This hybrid flowers early for its maturity and sets up grain quickly after pollination. Ears are cylinder with good tip fill. Husk cover is average. Plant health is very good but could benefit from a fungicide in eastern Canada. Position in and north of maturity zone at moderate populations.

FEATURES

CHU: 2250 **RM:** 75

TRAITS AND TECHNOLOGY

Roundup Ready® Corn 2

PRODUCT CHARACTERISTICS

Final Population 32-34
 CHU 50% Silk 1298
