

## HIGHLIGHTS

- Increased starch quantity
- Early flowering allows movement north
- Dependable tonnage

## AGRONOMY NOTES

Ultra early flowering hybrid with exceptional grain quality and test weight. Industry-leading early season vigour adapted for short seasons. Plants are shorter in stature with a long narrow ear. Husk cover is adequate. Ears are held on a long shank which hangs at harvest. Open husks at maturity aid rapid grain drydown. Above-average test weight. Responds to increased population. Adapted in and north of its maturity zone.

## FEATURES

**CHU:** 1975 **RM:** 71  **RIB**

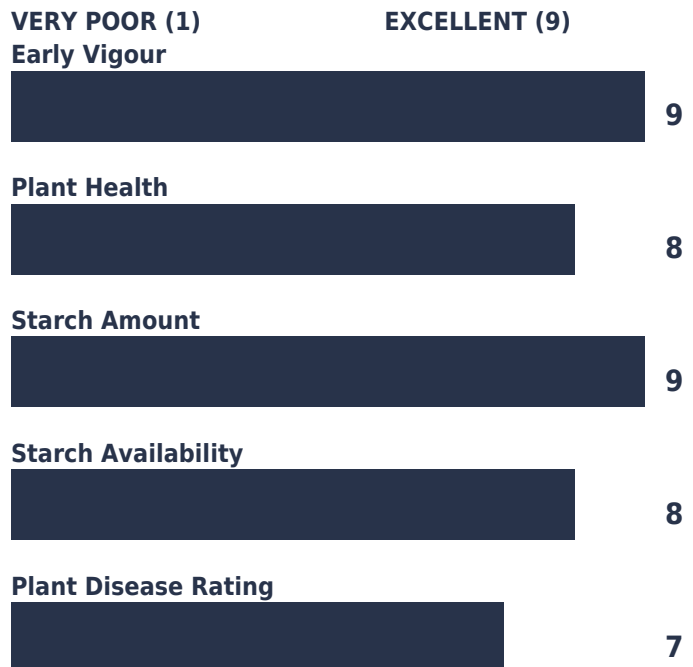

## TRAITS AND TECHNOLOGY

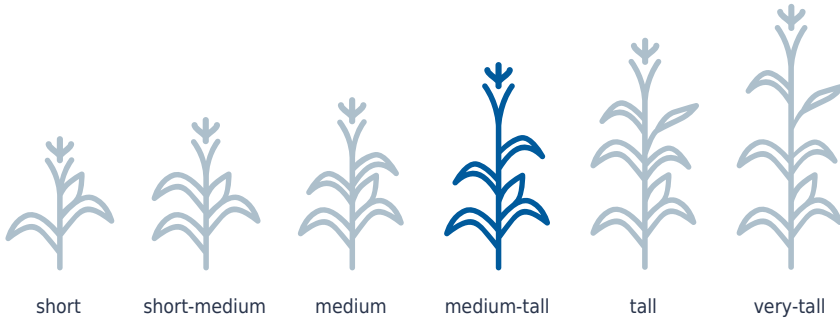

VT Double PRO® RIB Complete® Corn

## PRODUCT CHARACTERISTICS

Final Population      34-36  
 CHU 50% Silk        1250

## PLANT HEIGHT

## EAR CHARACTERISTICS

Kernel Texture    Medium

## DISEASE RATINGS

Disease ratings are based on the severity of infection.

**VERY POOR (1)**

**EXCELLENT (9)**

**Anthracnose**

**7**

**NCLB**

**6**
