

HIGHLIGHTS

- Leading yield potential
- Exceptional stress tolerance
- Industry leading spring vigour
- Stable across environments
- Excels in variable yield environments
- Favourable response to fungicide
- Moderate response to increased nitrogen and population

AGRONOMY NOTES

Hybrid starts the season with average seedling vigour. Seedlings have very upright leaves and visually appears small. Plants flower similar vs MZ 3033DBR. Plants are medium to tall height with medium ear height. Husk cover is adequate to long. Husks open well at harvest aiding grain drydown. Ears are 18-20 rows with average tip fill. Position in and north of zone for optimum yield. Excels in variable yield environments. Plant under moderate to higher populations (32-36K). Above average response to intensive management.
