

MZ 2711DBR

AGRONOMY NOTES

MZ 2711DBR is a compact plant with high yield potential. Plants start with average seedling vigour with an attractive deep green colour. Plants flower early for the maturity. At harvest MZ 2711DBR has average stay-green and plant health. Fall intactness is average as well. Stalks remain strong through harvest. Husks flare open aiding grain drydown. Grain quality is very good with average test weight. Postion north and south of zone at moderate populations. Plants would benefit from a fungicide at VT.

Highlights

- Compact plant stature
- Open husk at harvest
Incomplete ear tip fill
- Average plant intactness
- Average leaf disease tolerance
