

HIGHLIGHTS

- Strong agronomics with top-end yield
- Exceptional stalk strength for flexible harvest
- Excellent disease tolerance
- Impressive fall intactness
- Predicted slight response to fungicides

AGRONOMY NOTES

MZ 369 has strong seedling vigour. Plants are moderate in stature with higher ear height. Ears are shorter with a distinct taper or “bullet” shape. Kernels are deep and large. Husk cover is adequate to short and zips open at harvest. Plants have exceptional plant health, stay green and late season intactness. Excellent tolerance to NCLB. Ears drop slowly at harvest. Stalk strength is excellent. Position in and south of adapted zone. Performs across yield environments. Ideal for delayed harvest. Predicted slight response to fungicide.
