

HIGHLIGHTS

- Durable disease tolerance
- Excellent fall intactness
- Robust performance
- Solid stress tolerance

AGRONOMY NOTES

MZ 3818 combines predictable yield with solid agronomics. Seedlings have average seedling vigour with dark green colour. Plants have moderate plant and ear height. Ears are long and cylindrical with 18 kernel rows. Husk cover is adequate and covers the ear. Leaf disease tolerance is very good against common diseases like NCLB. Stalks are strong throughout harvest. Husks flare open in fall aiding drydown. Fall intactness and stay green are excellent. Position in and south of maturity zone at moderate populations. Excels under variable yield environments.

FEATURES

CHU: 2925 **RM:** 98  **RIB**

TRAITS AND TECHNOLOGY

VT Double PRO® RIB Complete® Corn

PRODUCT CHARACTERISTICS

Final Population	32-36
CHU 50% Silk	1698
Emergence	Very Good
Flowering	Late
Ear Height	Medium-High
Leaf Angle	Semi-Upright
