

MZ 395X

HIGHLIGHTS

- Large, robust plant type
- White cob for increased digestability
- Early flowering for northern movement

AGRONOMY NOTES

MZ 395X has above average seedling vigour. Plants are medium-tall with medium-high ear placement. Ears are impressive, having deep kernels. Cobs are white for increased digestability. Plants flower early for their maturity. Stalk and root strength is very good. Position: Performs both north and south of maturity zone. Excels in heavier soil types.
