

HIGHLIGHTS

- Exceptional late season intactness
- Consistent ear size
- Solid agronomics
- Reduced stature aids harvest

AGRONOMY NOTES

Industry leader from start to finish. Strong seedling vigour. Solid agronomics combined with exceptional plant health. Shorter plant stature and exceptional late season intactness aid harvest. Consistent ear size in variable environments. Ears are large with 18-20 rows. Position in and north of its maturity zone under moderate plant populations (32-34k). Responds favourably to intensive management. Responds to inputs across environments.
